AVR 7300 February 2005

“Think Big.”

“A multi channel amp that sets new benchmarks in its price class with its seven super powerful amplifier outputs and all necessary surround formats.”

“Such massive aluminum heat sinks with 28 output transistors can normally only be found in three times more expensive High End receivers. Even sound wise, the AVR 7300 reminds of a High End receiver.”

stereoplay Testurteil	
Klang CD/Surr.	Spitzenklasse 42/50 Punkte
Gesamterteil	gut - sehr gut 76 Punkte
Preis/Leistung	überrendend
