

Allroom – Nice design and well built

SWEDEN: Hemmabio, no 12 2002

Audio Pro Allroom has a nice design and are well built and with the nice bass in fresh memory - and the lower price - this is the system I choose!

“Audio Pro’s Allroom is a very small and compact system. The Allroom speakers sounds clean and straight without any fuzz. ... It’s not hard at all to fix the sound and we always put the basslevel between 75 - 100 Hz. The Allroom sub’s lowpassfilter cuts by 24 dB per octave. And guess if it shows. The bass has reptilian speed with a 100% contour and firmness. The bass sound natural and nothing is hidden away in a common lowbass-rumble. ... The tiny satellites also plays quickly and captivating. ...the sound let’s go very natural and for instance voices has very nice focus in the sound image.”

Loudspeakers in the test

Audio Pro Allroom sub/satellite system and Chario Piccolo sub/satellite system.
