

Quality on the bass!

SWEDEN: HemmaBio, no 6, 2006

“Its little bit like a world première of the totally fresh Avanti SW500...”

“The detail finish is for that price very good; Avanti qualifies easily for a place in the test with the more significant expensive competitors. Bigger woofer than Bravo (long-throw 12”) more power and 500W (the same as in Ace Bass 2) but this one placed in a closed cabinet.

Conclusion

“Price worthy challenger! Avanti SW500 appears more and more like a really all round sub as we played it.”

“Avanti SW500 is extremely worth its price and doesn’t make a fool of it self in comparison with almost twice as expensive subs.”

“Canton, but maybe even more Audio Pro impresses on this level and fight after all with a small price tag.”

- all round
- well-build
- the price!

Subs in the test:

Canton AS 120SC
Velodyne SPL 1000R
REL R 205
Polk PSW 1000
