

PM-09 – M3 Recommends!

SWEDEN: M3 Digital World, june 2005

Verdict: 8 out of 10

“Do you belong to the happy crowd that have a flat screen on the wall? In that case, you know how difficult it is to find matching loudspeakers. Audio Pro solves this problem with stylish design and plenty of energy.”

”So, how is the sound then? Loading in Matrix into the DVD-player and turning up the volume. The first thing we reflect upon is the clear presence. The midrange and the treble works together very nicely, and the sound is pleasant without any wimpish behaviour.”

”After plowing through a number of music records, we can state that these speakers give a lasting impression also in this area. They don’t make fools of themselves anywhere, they reproduce an even curve through the entire frequency range. The impedance is 8 ohm, which facilitates for the amplifier to keep a constant stream of current to the amplifier.”

Plus: Shape! Price! Sound!

Minus: Well, it should be the small cable connections.

Verdict: A luxurious and competent speakersystem that won’t make a too big hole in your wallet.

Shape/design: 9

Sound/quality: 8

Value for money: 8

Totally: 8
