

## Qube – Easy to place and surrounding

SWEDEN: HiFi & Musik, no 10 2005

Value for money: 8 out of 10

**”Qube is a small 2-way qube made as a floorstanding unit, spreading the sound angled upwards to give a more reflected sound, rather than direct sound. Perfect for filling the room with music and there is no need to sit straight up in the stereo seat, but will it also work as a surround speaker?”**

”Absolutely right, the Qube actually have the ability to completely blend into the sound stage and creating a very wide acoustic space - principally from acoustic recordings as Opus 3. The sound rounds off nicely and the Qube therefore easily matches the most differed front-systems.”

”The rounded treble and the low floorplacement, makes the sound a bit too diffused at times and it doesn’t manage to chisel the acoustic space in the same way as more directly aimed speakers can. However that doesn’t stop the Qube from being geniously easily placed in a way that will give you a very large surround feeling, as surruounding as dipoles. The design gives good support to the room, an important asset also for the back channels. Must be heard!”

### Verdict

Sound, music: 5 out of 10

Sound, film: 5 out of 10

Flexibility: 7 out of 10

Value for money: 8 out of 10
