

Black Diamond V.2 - Black gems

NORWAY: Lyd & Bilde, october 2004

“This is a great package. Especially suitable with music that isn’t too fast, but where a relatively deep bass is wanted.”

“Grand piano and contra bass will receive substance with Black Diamond V.2 than with smaller speakers. The speakers are not the fastest in the mid bass area, but tonally they sound very good. The biggest weakness is that they sound slightly thin in the upper mid bass area. The tweeter is impressive, but maybe not as polished as with smaller monitor speakers in the same price level. But then again, hardly any other floorstanding speakers in the same price range are.”

“Together with the expensive electronics the speaker convince with a rich and warm bass. It has more bass than it’s predecessor, which pulled more to the slender area. The bass is better than expected in relation to the price, even though it clearly has dynamic limits.”

“A very good combination, it is as simple as that.”

*Black Diamond V.2 tested with
Rotel RA-1062 and Rotel CDR-1072.*
