

Black Diamond V.2 - The Best of the Year

NORWAY: Lyd & Bilde: january 2005

"Audio Pro has fully earned our gold medal in the budget category!"

"Our previous floor standing reference speaker in the budget category has been upgraded in many ways. The tweeter is new and mounted in its own chamber to reduce distortion and to enhance the dynamics. The bass driver is also new in Black Diamond V.2 from Swedish Audio Pro."

"The loudspeakers convince with a full and warm bass. It has more bass than its predecessor, which was more slender. The bass is better than expected in relation to the price, even if it has clear dynamic limitations."

"The tweeter is dissolved, and it is obvious that it's working to mount it in its own chamber."
