

Best Speaker System Blue Diamond V.2, Black Vector V.2 & Qube

UNITED KINGDOM: Home Cinema Choice, april 2006 (reviewed: Issue 119)

Verdict: Best Speaker System under £2.000

“The first time our review team heard this system’s front floor-standing speakers we were blown away by their power. If you really like the floor to really shake when that T.Rex stomps through *Jurassic Park*, this is the setup for you.”

“The floorstanders incorporate built-in 175W active subwoofers, while the rest of the system consists of a centre and two rear speakers. The Black Vector centre has one 6.5” driver and one passive radiator, while the quirky Qube rears, with their sliced-off diagonal design, boast 5 1/2” drivers plus tweeters, and are ported underneath.”

“Put this package together and you get superb all-round performance with great imaging, dynamics, clarity and intelligibility, even when it’s under heavy drive.”

“Stylish and surprisingly affordable.”
